

SkillHer

UX Principles & Visual Foundations

Week 1 — Design Fundamentals

Skill Set Go EduTech — UI/UX Design Internship

A practical documentation of the UX principles and visual foundations applied to the SkillHer learning platform.

UX Principles

Core principles applied to the SkillHer learning experience

Clarity

Users should quickly understand what they can do on a screen.

Clear headings and a direct **“Get Started”** action help users understand the next step.

Consistency

Similar elements should look and behave in similar ways.

Buttons, cards, typography and spacing follow a consistent visual pattern throughout the interface.

Visibility

Important information and actions should be easy to notice.

Search, skill categories and key learning actions are kept visible and easy to find.

Feedback

The interface should communicate the result of a user's action.

Progress indicators and selected states help learners understand what has happened and where they are.

Accessibility

Content and controls should be easy to read and interact with.

Readable typography, clear contrast and appropriately sized interactive elements support easier use.

User Control

Users should be able to navigate and control their journey.

Clear navigation and back/forward movement allow learners to move through the learning experience confidently.

Visual Foundations

The visual system used to create a clear and consistent SkillHer experience

Typography

Inter Font

Primary typeface for the SkillHer interface.

- **H1 — 32 px / Bold**
- **H2 — 24 px / Semibold**
- **H3 — 20 px / Semibold**
- **Body — 16 px / Regular**
- **Small — 14 px / Regular**
- **Caption — 12 px / Regular**

Color Palette

Primary	7C3AED
Secondary	EC4899
Background	F8FAFC
Surface	FFFFFF
Primary Text	111827
Secondary Text	64748B
Accent	06B6D4
Success	10B981

Spacing & Grid

Spacing & Layout

Spacing scale	4 / 8 / 16 / 24 / 32 / 48 px
Grid	12-column layout
Mobile padding	16 px

UI Styling

Button height	48 px
Standard radius	12 px
Card radius	16 px
Style	Clean, minimal and user-focused
